Summary

Backend-focused developer (final-year B.Tech CS, AI & ML) building production-grade REST APIs and AI-integrated systems. Architected PrepSense, a Node.js/Express/MongoDB platform with JWT authentication, rate-limited AI pipelines, and a custom scoring engine; built and deployed NutriTrack, a full-stack app using PostgreSQL, Prisma, and the Google Gemini API. Supported by AWS, Linux, and network security certifications. Solved 300+ DSA problems on LeetCode and HackerRank.

Education

G.L. Bajaj Institute of Technology and Management	2023 – 2027
<i>B.Tech in Computer Science and Engineering (AI & ML) — CGPA: 8.5</i>	
CBSE – Senior Secondary (Class XII)	2021 – 2022
<i>Percentage: 82%</i>	
CBSE – Secondary (Class X)	2019 – 2020
<i>Percentage: 86%</i>	

Projects

PrepSense – AI-Powered Mock Interview & Placement Readiness Platform GitHub

- Architected a Node.js/Express REST API with MongoDB/Mongoose, implementing IDOR-protected session ownership checks, JWT + bcrypt authentication, and role-based admin middleware with live-DB privilege checks for immediate revocation.
- Built an AI question-generation and answer-evaluation pipeline on the Gemini API with a TTL-based response cache and two independent retry layers (API-failure and validation-failure) to handle unreliable LLM outputs.
- Designed a difficulty-weighted scoring engine (topic-wise and session-wise aggregation, trend detection across sessions) and applied per-route rate limiting to control AI API cost exposure.
- **Technologies:** Node.js, Express.js, MongoDB, Mongoose, JWT, Gemini API, Rate Limiting

NutriTrack – AI-Powered Calorie & Nutrition Tracker GitHub | Live Demo

- Built and deployed a full-stack nutrition tracking app with AI-powered food recognition via the Google Gemini API, supporting text and photo-based logging.
- Designed a normalized PostgreSQL schema with Prisma ORM covering users, meals, and nutrition logs; built RESTful APIs in Node.js + Express with JWT-based stateless authentication.
- Implemented an onboarding flow calculating TDEE, calorie, and protein targets, plus a calendar-based history view and an AI health chatbot.
- **Technologies:** React, Node.js, Express, PostgreSQL, Prisma, Google Gemini API, JWT, Tailwind CSS

Technical Skills

Backend: Node.js, Express.js, REST API Design, JWT Authentication

AI & ML Integration: Google Gemini API, LLM APIs, Prompt Engineering, Rate-Limited AI Pipelines

Databases: PostgreSQL, MongoDB, Prisma ORM, Mongoose, MySQL

Programming Languages: Java, JavaScript, Python, C

Frontend: React.js, HTML, CSS, Tailwind CSS

Cloud & Systems: AWS Cloud Foundations, Linux Administration (Red Hat)

Networking & Security: CCNA, Network Security Fundamentals

Developer Tools: Git, GitHub, VS Code, Jupyter Notebook, Google Colab

Core CS: Data Structures & Algorithms, OOP, DBMS, Computer Networks

Certifications

- **AWS Academy Cloud Foundations** — AWS Academy
- **CCNA: Introduction to Networks & Switching, Routing and Wireless Essentials** — Cisco Networking Academy
- **Cybersecurity Foundation, Network Security & Cloud Security Fundamentals** — Palo Alto Networks
- **Linux System Administration I & II** — Red Hat

Achievements

- Solved **300+ DSA problems** on **LeetCode** & **HackerRank**; selected in college-level **Smart India Hackathon (SIH)** screening for a real-world problem statement.
- Participated in multiple inter-college hackathons, contributing to AI and software-based projects in collaborative team environments.
